Congratulations on finding Australia's finest quality barbeques!

Our objective is to manufacture barbeques that will demonstrate great cooking performance and exceptional longevity with an understated contemporary design.

You can specify your own Lifestyle barbeque from our modular system (The part codes in brackets are for a 4-Burner barbeque specification)

1. The first decision is for you to select the **barbeque frame** (eg 4BF) or firebox size to suit your cooking needs. Sizes and cooking widths are: 2-Burner (480mm wide); 3-Burner (640mm wide); 4-Burner (800mm wide) or 5-Burner Barbeque Frame (960mm wide 'left to right' x 485mm deep 'front to back' cooking surface area). If you want something bigger or special have a look at
 - [Custom BBQs and Outdoor Kitchens](#) or
 - [Charcoal BBQs](#) or
 - [4WD/Fishing/Camping/Caravan BBQs](#)
2. Then select either *stainless steel* (International - 25 year warranty – eg 4B BPI) or porcelain enamel-coated *cast-iron* (Sea View, 4B BPP) cooking surfaces (or '**burner pack**')
3. You can select one of two kinds of **roasting hood** - International (4B RHI, with furnace grade ceramic glass viewing window) or Sea View (4B RHP, full stainless steel without viewing window).
 - Or if you do not want to be able to prepare roasts on your barbeque (open grilling and frying only) you may select a stainless steel **flat rain cover** (4B RCF) instead.
4. If the barbeque is to be built in to a custom-made benchtop, the standard heavy duty **built-in kit** comprising stainless steel brackets, spacers and fasteners (BI KIT-1) will need to be ordered.
 - Or if the barbeque is to replace a built-in barbeque in an existing benchtop, the **long series built-in kit** will need to be ordered (BI KIT-2).
 - Or if the barbeque is to be bolted to a masonry wall, the **wall mounting kit** comprising heavy duty 3mm thick stainless steel brackets, spacers and fasteners will need to be selected (BI KIT-3)

5. If an **open trolley** is preferred (ie without the panel system that makes up the cabinet kit) then select the Sea View open stainless steel open trolley kit (4B TSV) in your specification.
 - Or to order a barbeque with **trolley AND cabinet**, select the International Trolley and Cabinet Kit (4B TCI)
6. Similarly, if you do not require a side burner, select the plain stainless steel **side serveries** (S/S KIT) for both left and right hand sides.
 - Or to have a **side burner** for the right hand side select the Side Burner Kit (S/B KIT) instead.
7. Then decide if you need a polyester/PVC **heavy duty fabric cover** (eg 4B CHD-1)
 - Or if your barbeque is to be built-in, select a polyester/PVC **built-in cover** (eg 4B CBI-1)
8. If you want to be able to prepare rotisserie roasts on your barbeque you can choose from one of three kinds of **rotisserie kit**:
 - R KIT-1 Battery operated, chrome plated shaft (2-B and 3-Burner barbeques)
 - R KIT-2 240V power, chrome plated shaft (all barbeques)
 - R KIT-3 240V Stainless Steel motor, shaft and prongs
9. Then advise your dealer if you require your barbeque to be **assembled** (ASSY)
10. Then advise your dealer if you require your barbeque to be **delivered**. (DEL)
 - Delivery in fully assembled form is usually more expensive than delivery in cartons (for you to put your barbeque together following the instructions)
 - If you decide to collect your barbeque fully assembled by your dealer you will need a utility, van or trailer.
